md5sum 6a7130e1acc99c4f76b59f3f7dfb045d

These images require a storage device of atleast 8GB and can be imaged using [Etcher.io](https://www.etcher.io)

## MPD Sources

We use several different versions of the MPD between the two firmware revisions. As of March 3 2021 we do not modify MPD and leave them as stock. This archive includes the configuration as to documentation which plug-ins/features are supported.
