BRYSTON VINTAGE - 'BACK TO THE FUTURE'

Very Early Version of the Bryston 4B

There are literally thousands of aging vintage Bryston amplifiers out there dating back to the middle 1970's that are currently out of warranty.

Bryston is pleased to offer a special **'PILOT'** program to retrofit and restore any older vintage version of your Bryston amplifier to bring it up to the performance level it was originally designed for or even better given today's more sophisticated parts and technologies.

Designated our 'Back To The Future Series.'

Please email us with the Model Number and Serial Number and Phone number of your vintage Bryston amplifier so we can organize the details.

Given the availability of more modern or proprietary Bryston custom parts it may be feasible to provide an even better level of performance than was available back when your Bryston am-

plifier was first manufactured.

We will also be offering a limited 3 Year warranty on any upgrade to a vintage version of your amplifiers.

Please email David if interested

davidnelson.bryston@gmail.com

***** THIS IS A PILOT PROGRAM AVAILABLE IN NORTH AMERICA ONLY FOR NOW.**
