INTRODUCING THE NEW

BRYSTON

BDP-1USB

Digital Music Player

EXCELLENCE in digital playback is a cost-no-object endeavor, but expense in engineering should not demand unnecessary features. If your digital-to-analog converter features only a USB input, or USB is the best sounding way to connect your source, choose Bryston's BDP-1USB.

SOUND QUALITY When used with a USB DAC the expensive custom audiophile sound card found in our BDP-2 serves no purpose. The BDP-1USB eliminates this cost and saves you money with no sound quality penalty. The system is powered by a noiseless linear power supply which will not pollute the delicate digital audio path or your AC mains. It can also comfortably manage complex music libraries of up to 30,000 tracks stored on either locally connected USB drives or your home NAS.

FEATURES A vast array of features such as UPnP compatibility, Squeezebox® emulation, DoP (DSD over PCM), and more are all built in to our intuitive and attractive firmware accessible from practically all web browsers.

CONTROL Comfortably control your BDP-1USB from your chair using Android or iOS tablets and mobile phones using our built-in interface or your choice of many 3rd party apps.

You just discovered the perfect partner for your USB DAC. Hear the most engaging musical experience possible—Bryston's new BDP-1USB.

PURE SOUND
ELEGANT SIMPLICITY
