

BRYSTON Welcomes **TARGET** AUDIO PRODUCTS

Big News!

Bryston proudly welcomes Target Audio Products to our complete line of high performance audio equipment. We are the exclusive international distributor.

Music lovers and sound quality experts have long known that “bookshelf” speakers perform best when coupled to robust high quality loudspeaker stands. In 1981, Target pioneered the concept of high mass, high rigidity stands. Weighing up to 44 pounds (20 kgs.) per stand, today’s Target products are fully manufactured in North America and represent the finest quality, best sounding stands available for loudspeakers of all price categories. Each stand is constructed of hot-rolled steel and is finished in a rugged yet attractive powdercoat ensuring years of durability.

A Natural Partnership

Like Bryston, Target manufactures top-quality products based on the science of sound without dubious claims of uncertain merit. Both brands are based in Ontario, Canada which ensures a streamlined quality control and distribution strategy

Beyond Bryston Loudspeakers

Target offers 4 lines of increasingly robust stands each available in heights ranging from 20 inches to 28 inches designed for compatibility with virtually all shelf and stand-mount loudspeakers.
