

A Lifetime of Music

MEMO: To All Bryston Customers

SUBJECT: Dealer Feedback – New BDP-1USB Player

Hi guys,

I just thought you should know that I have my new Bryston BDP-1 USB on the floor and sounding great!

It's important to note that we have never had a digital front end sound so amazing for so little cash. A customer could easily go out and buy a decent \$500 USB DAC and partner it with the BDP-1USB for a street value of about \$2000. I currently have it connected to a \$900 USB power DAC and it's just awesome!

I have a lot of customer using dedicated PC/Macs for this purpose and I can now easily sway them.

Thanks again and keep up the solid work!

James
