

A Lifetime of Music

MEMO: To All Bryston Customers

SUBJECT: Bryston A3 Speaker – Distributor Comments

March 2016

Hi James,

Three (3) wonderful products arrived at PMC from Bryston recently.

1. The Cubed amps are amazing. So much smoother, greater depth and height information. It all sounds so much more “real” A big thank you to whoever came up with this improvement.

We are measuring substantially lower THD at high frequencies (always a good sign) and the common mode rejection of the balanced inputs is almost 20dB better.....incredible results!

2. We’ve just run up the Bryston A3 speakers and we’re really excited.

They sound great and they offer a lot of performance for the money.

3. The BDA-3 blows the BDA-2 out of the game.

So much more detail, smoother and well-judged overall balance.

Thank you,
Peter Thomas,
Managing Director
