

A Lifetime of Music

MEMO: To All Bryston Customers

SUBJECT: Bryston BHA-1 Headphone Amplifier

April 2016

Hi James

After my previous amp developed problems for the second time, I decided to obtain an amplifier that was my favorite at the last Portland meet, cost no object (and there were some very expensive amps there), and despite the large amount of desk real estate it takes, namely the Bryston BHA-1.

BRYSTON BHA-1 HEADPHONE AMPLIFIER

This is a shockingly good amplifier. It does everything well. Completely neutral. Butter smooth up to ear bleed volumes. Amazing imaging.

You rarely see it mentioned on Head-Fi, which is a big shame.

The BHA-1 Headphone amplifier is a giant killer.

S Bradly
