

A Lifetime of Music

MEMO: To All Bryston Customers

SUBJECT: Bryston BCD-1 CD Player – Feedback

Finally! It's here!

Right out of the box this CD player rocks. Listening to Melody Gardot as I write this and I'm glad I waited and didn't succumb to other very good CD players.

I'll post pictures shortly, but for now this is a great compliment component to the BDA3 and, I would surmise the BDP2.

It is very, very quiet, the tray makes very little noise when opening or closing. The unit is solid and well built much like the other digital components Bryston has recently produced.

For, those of you who stream music and have a digital set-up and are looking for an excellent no-nonsense CD player that will revitalize your red book CD collection, I would have to argue you'd be hard pressed to do better than the Bryston BCD-3.
