

A Lifetime of Music

MEMO: To All Bryston Customers

SUBJECT: Bryston BCD-3 CD Player Feedback

December 2016

Hi Bryston

Got my new CD Player just in time for Christmas!

Have the Bryston BCD-3 CD Player connected via Siltech Royal Signature Princess XLR to XLR, Siltech Royal Signature Ruby Mountain II power capable to PS Audio P10 regenerator. Powered by Pass Labs INT-60 with Siltech Royal Signature Ruby Mountains II power cable into PS Audio P10 Regenerator. Connected to Wilson Audio Yvette speakers via Siltech Royal Signature Prince spade to spade cables.

With this setup, the Bryston BCD-3 CD Player Sounds Devine.

This thing sounds great out of the box. Very full soundstage, articulate, pin point, natural, 100% grain free, dead quiet drive, ultra black background, etc. Wonder has it'll sound when fully broken in. How long of play time to fully break in?

Time to enjoy, now. This product is A+++

Have a Merry Christmas. BCD-3 sounds better than BCD-1, hands down!

Chow, Siltech
