

A Lifetime of Music

MEMO: To All Bryston Customers
SUBJECT: Bryston DAC – Customer Feedback

December 2016

Dear all at Bryston,

A couple of weeks ago I bought a used Bryston DAC to pair with my new Meridian Media Core 200 and my well used Sugden Masterclass IA4 amp with Harbeth Monitor 30 speakers- yes, I live in England, a stones throw from where Beatles came from.

I would like to say that your DAC is truly fantastic in its music making and blends beautifully in my system.

Until now I was mainly listening on LPs, and disregarded CD replay-(A Naim CD player) - I am now enjoying digital music again.

I did try few DACs before and what I like the best about Bryston is, in my humble non-specialist opinion, the focus on the reproduction of music to a very high level without the audio fatigue, and the soundstage it produces. Well done and great work in producing this great equipment.

I do not buy Hi-fi equipment often, but in the future if I am looking to upgrade, Bryston is right up there in my list. Meanwhile, I will advise my hi-fi non-believer friends and colleagues to try one themselves to see the light.

Best wishes and Merry Christmas.
