

A Lifetime of Music

MEMO: To All Bryston Customers
SUBJECT: Bryston BCD-1 CD Player – Feedback

January 2017

Hi James,

I received my CD player five days ago and a review I find is difficult to put into general audiophile terminology.

Very large soundstage, timbre, pace and tonal accuracy. However, this unit is also simply musical. I put in my favorite CDs and forget about what I am supposed to hear and enjoy the music.

There is not the in-your-face detail as I experienced with my OPPO 105 but a very truthful and musical experience.

With my new Bryston BCD-3 my system came to life, both output RCA and XLR sound great. I have up-graded the power cord and 1 fuse for now (need 2 fuses 1A 5x20 SB inside) with very nice result, more relaxed and full... Last 30 years I have owned: Denon 1520, CAL Icon 2, CJ, YBA, AR, Rega Saturn and more before and this Bryston is the most truthful and musical to my ears.

Now, let's play the music! Thanks Bryston!

Steve
