

A Lifetime of Music

MEMO: To All Bryston Customers

SUBJECT: Bryston SP-4 Processor – Distributor Feedback

July 2018

Hi James,

Our Malaysian Audio/Video Show is just a week away so we are auditioning the new Bryston SP-4 Surround Processor which we intend to use at the show.

Have not use the Dirac Live room correction yet but after the initial setup the Bryston SP-4 Surround Processor has tremendous potential.

Out of the gate, the picture quality is great, even better than the Acurus Act 4 (replaced the SP3) we were using till now.

The sound, it is definitively more immersive and weightier too. Can't wait to hear it after we have the opportunity to do the Dirac Live calibration on the Subs, Centre and Surrounds.

Will keep you posted.

Regards,
James Tan
