Sunny Components

1370 E. Cypress St, Covina, CA 91724. Closed Sun and Mon.
10am-5.30pm weekdays. 11am-4pm Sat.

Hi James,

Our Target Audio stands sound quite amazing!

Here are some new pictures of Briston systems on the Target Audio Component Stands.

What's Coming Soon **TARGET** AUDIO

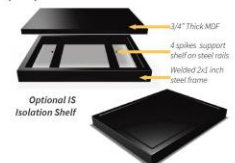

Anybody serious about isolating their turntable should strongly consider a wall-mount shelf like Target's venerable VW model. A welded steel frame is screwed directly into your wall studs (16 inch OC) in 4 places. A heavy steel isolation shelf frame bolts onto the wall-mounted frame. Inset and placed upon upturned spikes rests a 3/4" MDF shelf insert upon which you place your turntable or other audio equipment. The VW is painted with a durable black textured powdercoat and the MDF shelf insert is laminated to cosmetically match.

VW Vertical Wall Shelf

Audio electronics need to be placed upon a sturdy rigid platform to securely resist resonance. Target's new ESV 60 (24" tall) and ESV 90 (36" tall) equipment racks include 4 2" x 3" profile steel legs and include 3 component shelves each. Each CS component shelf features a thick steel frame into which a thick, laminated MDF shelf is inserted. ESV 60 racks can support up to 2 additional CS shelves and ESV 90 racks can support up to 3 additional shelves. Optional spikes or casters are also available.

If you require additional isolation, Replace shelves with the even more rugged IS isolation shelf. Constructed of the same 1 x 2 inch steel as the VW, this unit supports a 3/4 inch thick MDF shelf on spikes which is ideal for particularly vibration sensitive equipment such as tube preamplifiers and turntables.

Optional IS Isolation Shelf
