MEMO: To All Bryston Customers

SUBJECT: Bryston 7B Cubed Amplifier – Customer Feedback

June, 2019

“Hi Folks,

Just wanted to praise you guys at Bryston for the amazing cubed series amplifiers!

I have been running for several weeks now a pair of Bryston 7B3 Cubed mono block amplifiers on my Sonus Faber Olympica 3 speakers.

Your amps have replaced my 10 year old MBL 8011am mono amps. These amps listed for 15,000 dollars back then!

I have to say the Bryston 7B Cubes are a mass improvement.

I have lost the bass bloat from the MBLs and gained definition in all frequencies! What makes the 7Bs so special, is the fact they don't call attention to themselves! They just do their job! They will let you know what is connected up stream!

In my case it was a bonus since I am using a EMM labs pre 2 preamp. For digital the New Marantz SA10 flagship player with a VPI turntable. The 7B's have virtually disappeared from the system! I am telling all of my audiophile friends about your products!

Thank you to my Canadian neighbors for making such an incredible product at a very fair price!”

Herb from New York!
