STELLAR SOUND!

The Verdict:

"I did not believe that the older Bryston 14B SST2 amplifier could be improved upon!

A bastion of neutrality, gobs of power and bipolar output, bass quickness that squeezed out the last ounce of low extension.

However, the new 14B has got that power slam and more, plus relays a sense of detail refinement in smoothness, imaging and upper-end "air" over the old one. Dare I say, it is even better than the old amp with hi-res music, such as DSD 5.6, and 24/352 PCM. And I thought the old 14B was already a good hi-res capable, high power amp.

The new Bryston 14B3 Cube is certainly an Everything Audio Network Stellar Sound Award winner and a candidate for amp of the year."
